

MSAPMOHS217A – Gas Test Atmospheres

Duration: 6 hours

Course Cost: \$200.00 per person

Mode of Delivery: Face-to-face (Classroom)

Pre-requisites: Nil

This unit is about testing the working atmosphere to determine if it is safe for the proposed work. Testing involves the use of electronic test apparatus. In a typical scenario an individual may be required to carry out gas testing of an atmosphere prior to entering a specific area or workspace. The competency requires the person to interpret readings and take actions based on the interpretation.

Target audience:

The target group will be construction workers requiring training in safely working in monitoring atmospheres within confined space and other areas, at worksites within:

- Civil construction
- Mining
- Drilling
- Extractive industries
- Farming etc.

People who supervise but do not necessarily perform tests or enter confined spaces need to be aware of the risks and equipment checks that need to be in place to adequately protect people under their control.

Award issued:

Students who successfully complete this nationally recognised training will be awarded the statement of attainment:

- MSAPMOHS217A GAS TEST ATMOSPHERES
